

Jordan University of Science and Technology
Computer information System Department – CIS201
Extra (Optional) Assignment(3.0 – Pts.)/ SUMMER Semester
2023Due Date: Wednesday 23, August ,2023 @5:00 PM

✓ **Create a Single web page - portfolio website :**

- Tell us about yourself (educations , soft and programming skills ,etc.)
- Answer the following question: Where do you see yourself in 5 years?
- A "mail to" link that provides your e-mail address.

✓ **Add style with CSS!**

- You may use properties you have learned in lab such as color, background-color, font, width/height, text decoration, borders, etc.

✓ **Launch Your Website:**

- After you have built your website, you are now ready to share it with the world. To do so you must upload your files into **JUST** server.
 - ✓ As students, all of you already have accounts set up on the **J.U.S.T web server**.
 - ✓ To put your web pages online, we will use the **File Transfer Protocol**, more commonly known as FTP.
 - ✓ Upload the webpage you have created to your web server following these step:
 - <https://www.just.edu.jo/Centers/cic/Lists/Services/DispForm.aspx?ID=11>
 - [Here's a detailed video tutorial step-by-step guide that will teach how to upload your website](#)

Tip: The way a Web server chooses a default page to display is simple: When it receives a request that does not include a file name, it consults a list of default file names (such as "index.html", "index.htm", and so forth) and displays the first matching file it finds.

➤ **Submission:**

- Submit **Only** your website URL to eLearning :
 - Ex. <http://students.just.edu.jo/~143892/>
